Snakemoney

It's Game time!

Snakemoney.io

Snakemoney.io is a fully featured play-to-earn game.
The game has its own player-driven economy, which means that all assets are either generated from the player's work or created by the player. Snakemoney.io is an intuitive dynamic game in which only the player decides his future and determines the priorities and development of the game himself, with extensive content, modes, specifications, events and elements.
The game does not contain any bots or artificially created defeat conditions - it is a fair play-to-earn game based on the experience and skill of the player!

Our mission

Our mission is to combine video games, blockchain and human imagination to create a permanent virtual world that can offer any person connected to the Internet to earn real money.
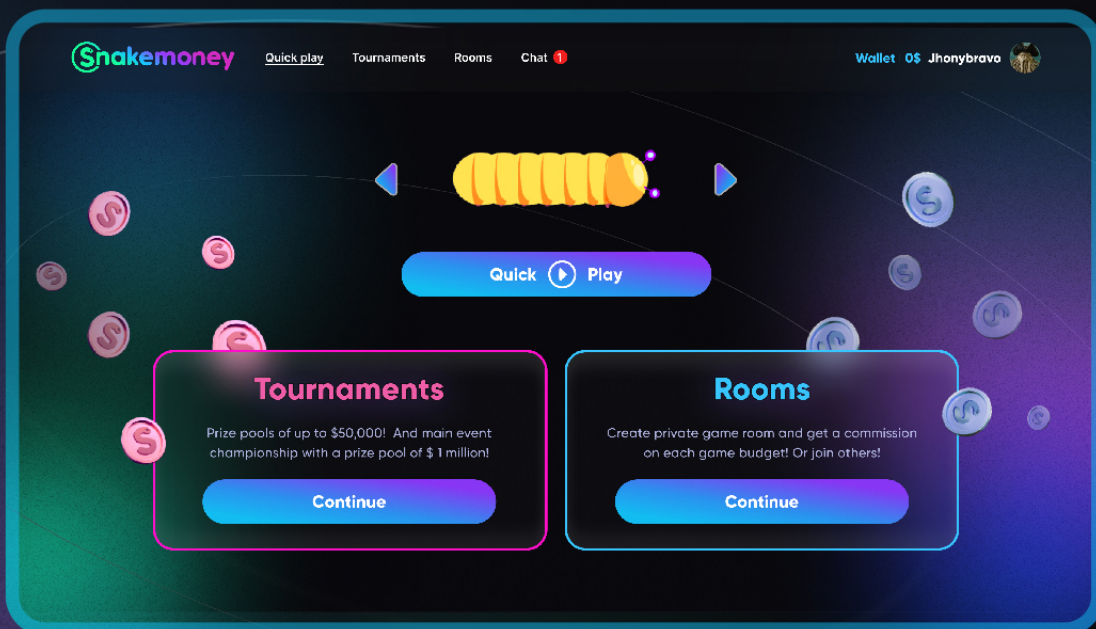

The game

The game Snakemoney.io has several game modes with different levels of earnings:

1. CHOOSE YOUR SNAKE AND COLLECT AS MANY GAME COINS AS YOU CAN - THE GAME COSTS ONLY $1!

The first play-to-earn option is a $1 game where you have to collect as many coins as possible and try "not to die" :). This game has exactly the same conditions for all players! The terms of the game are very simple and the price of the game is $1. This amount of money is deducted from your wallet balance and scattered on the map in the form of coins with a face value of: $ 0.05 >>> $ 0.01 >>> $ 0.02 >>> $ 0.035
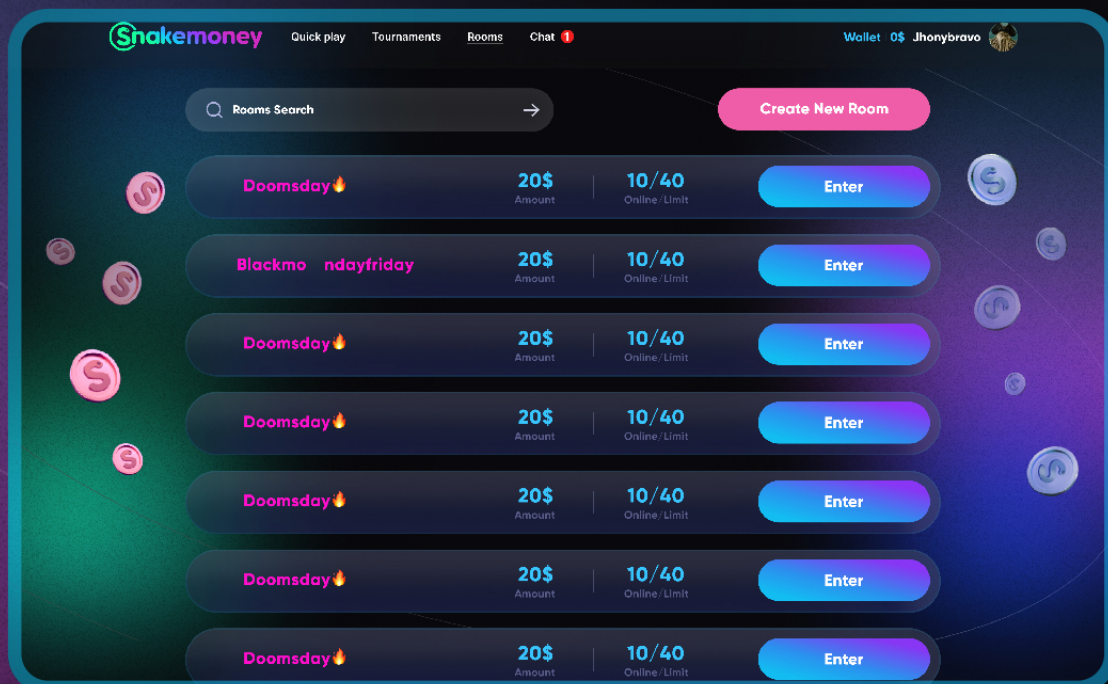

The game is divided into rooms of <=40 players, the number of game rooms is practically unlimited. Each player costs $1 to start the game. The player can end the game whenever he wants - after collecting more than the invested amount or without collecting it, the collected funds are credited to his game wallet. A player is out of the game and loses the collected funds if he hits an obstacle (another player, a wall, etc.) with the front (head) of the snake, the coins he has are scattered in that area and can be collected by other players.

When a player is eliminated and the number of players decreases, his place is automatically taken by a new player who joined at that time, so that the number of players in that room fills up to 40 - and so on ad infinitum, so the flow of new coins does not stop. Once you've practiced and mastered the game, you can always leave the game with a significantly increased wallet!

2. PRIVATE GAME ROOMS - CREATE A GAME ON YOUR OWN TERMS AND GET COMMISSIONS FROM THE GAME AMOUNT COLLECTED!

The second way to earn is by creating private game rooms - anyone who wants to can create a game room with their own rules, set the number of players (no more than 40) and the amount with which the game can be started.
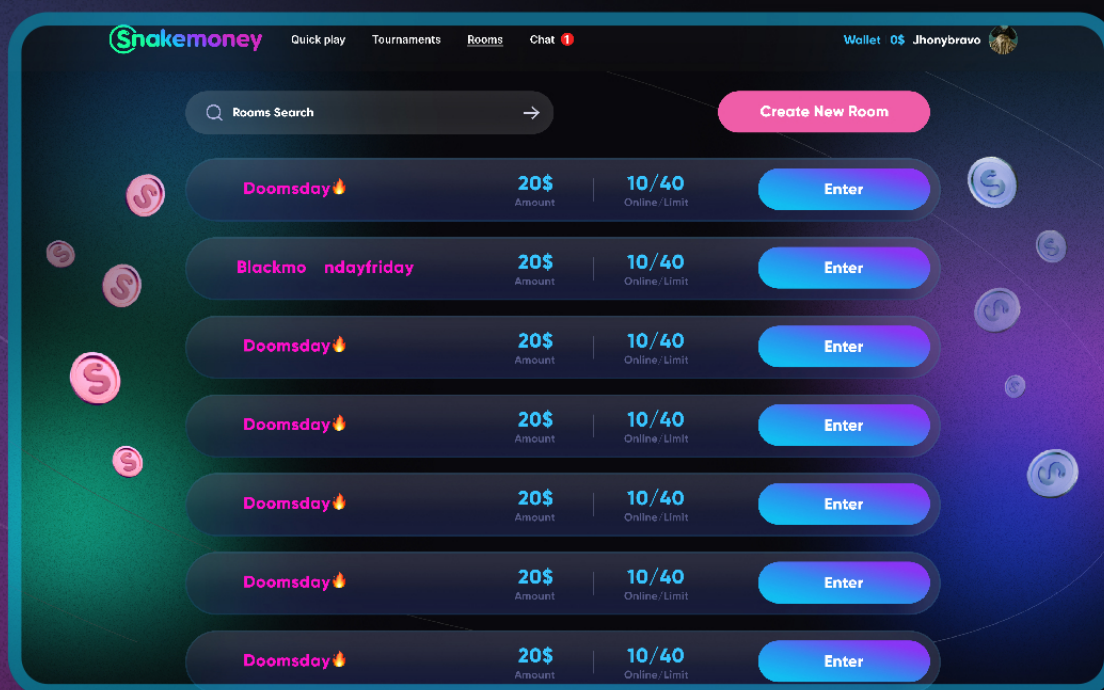

For example, after creating a room with 20 players and a bet of $100, there will be $2,000 worth of coins on the playing field, so players will have to rush to collect as many coins as possible and be careful not to hit an obstacle, otherwise they will lose all their collected funds. Each player will be able to finish the game at any time, so winning will be determined by speed, intelligence and risk control. You can also develop additional winning strategies and tactics, such as team play to collect more coins, avoid elimination from the game and "hunt" other players to collect their lost coins - so practice, fantasize, strategize with your friends and win as much as possible!

To create your own game room, you must have at least 100 SNAM tokens in your wallet (you only need to have, no payment is required)
The player who created the room also receives a reward for creating the room - 5% of the total amount collected in the game room;
For example, a collected private room amount of $2000 will bring you a commission of $100!

3. WEEKLY TOURNAMENTS WITH PRIZE POOLS UP TO $50,000!

The third way to earn - participate in tournaments and organize tournaments. Anyone can participate in tournaments, and sponsors and partners who are interested in various advertising and promoting the brand can organize tournaments.
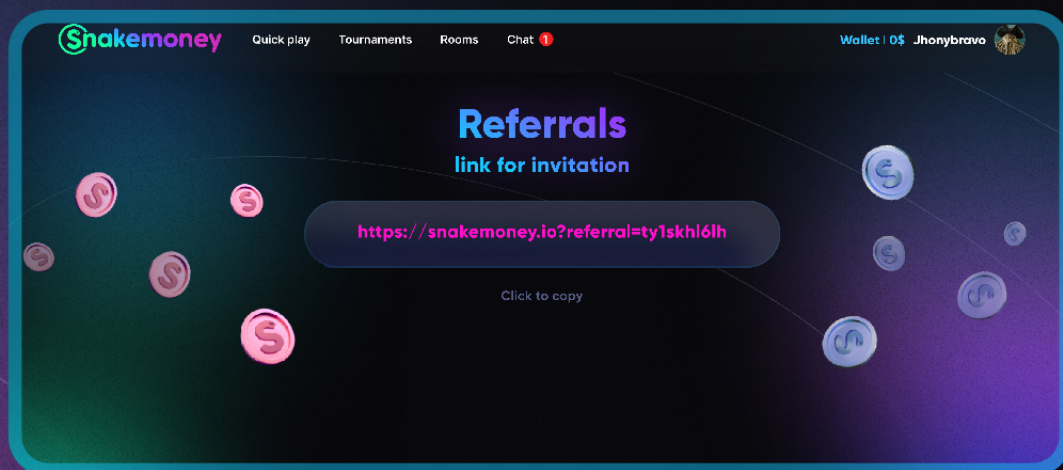

The tournaments will be both PAID (with an entry fee) and FREE (with an entry fee paid by sponsors)

Several hundreds of players can participate in each tournament, and the win goes to a few (3-10) top players who share the entire prize pool. Tournament prize pools of up to $50,000 are expected, and the number of tournaments is 10-50 each week, and that's not the limit! Imagine yourself taking first place in the tournament and winning $20,000... And you can try even up to 50 times a week! In sponsor and partner tournaments, the conditions will be determined by the sponsors themselves. In most cases, these tournaments will be free (without an initial bet) and will be open to players who meet the conditions of the tournament sponsors.

In turn, Snakemoney.io will create additional bonuses for tournament participants and winners!

4. RECOMMEND THE GAME TO YOUR FRIENDS AND EARN >=1% OF REFERRAL INCOME!

The fourth way to earn is a referral link through which you can invite new players and receive 1% of each of their replenishment of the game on an ongoing basis. Also special programs for Snakemoney.io marketing partners that allow you to earn up to 3% for referrals!
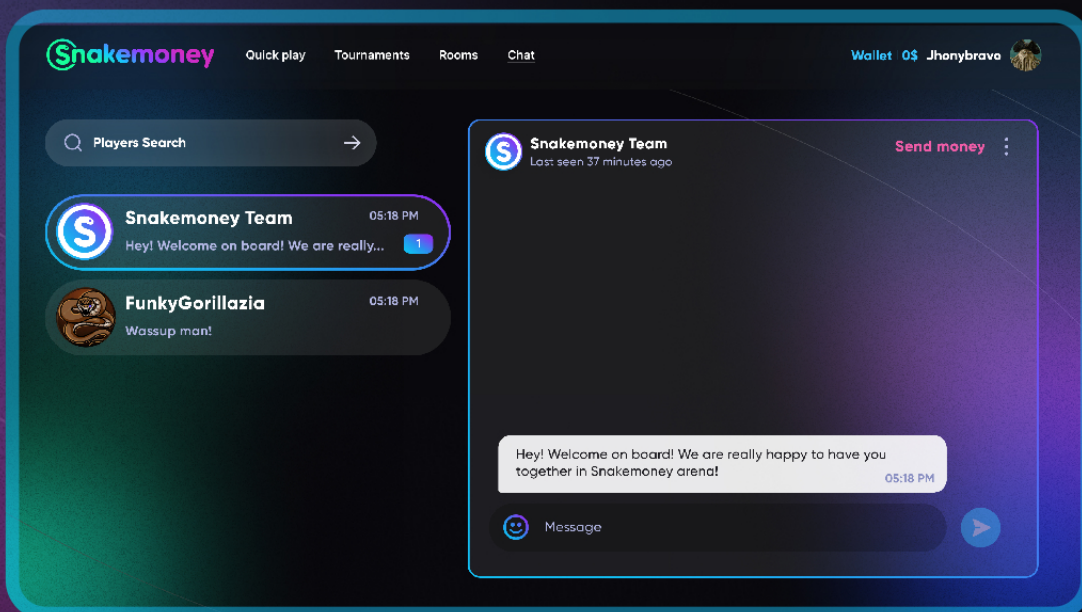

5. NFT CARDS THAT GIVE THE SNAKE A SPECIAL LOOK AND NEW FEATURES

The fifth way to earn is NFT cards that will allow the player to change the appearance of their snakes, create snakes from fragments and improve the characteristics of the snakes (movement speed, acceleration time, etc.). In the near future, Snakemoney.io members will be able to create, buy, sell NFTs in our NFT marketplace. This is a great way to earn and increase your snake's chances of winning in the game!

6. CHAT FUNCTION - CONTACT FRIENDS, SEND/RECEIVE GAME MONEY, CREATE GAME STRATEGIES AND MORE!

In the convenient Chat you can share your experiences with friends, discuss tactics and strategies and spend time chatting while relaxing after an intense game.
You can use the Chat menu to send money to a friend, block a player, delete a chat, more features coming soon!

GAME ECONOMY

Players earn by collecting coins, receiving commissions for private game rooms, winning tournament prizes, receiving commissions for referrals, buying and selling NFTs, and can also receive rewards for created game characters.
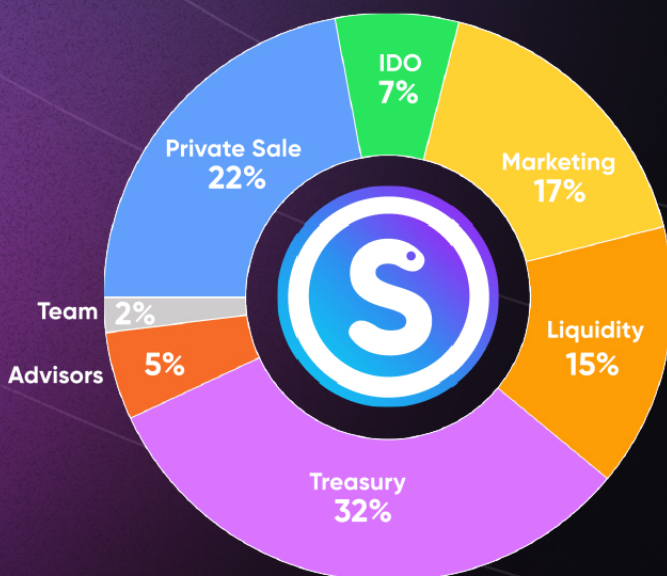

Play-to-earn gameplay tokenization directly creates a competitive environment within the game. Players need to compete, train and create game strategies together in order to generate more profit by interacting in a player-driven economy.

Players can access and play the game immediately without purchasing an NFT. Interaction with tokenized technology depends on the will of the player.

With a player-driven economy model, gamers who contribute to the ecosystem and forms the economy of the game can earn rewards either by by completing tasks or achieving results in the game or by trading assets obtained for time spent in the game or other merits.

A separate communication platform/investor (whale) club will be created for Snakemoney.io investors, where decisions will be made useful for the development and popularization of the Snakemoney.io project.
Club members will have internal procedures and agreements to follow, as well as special NFT cards for club members. Club members will ensure that chaotic and thoughtless decisions that are not beneficial to the project are not made, so that the project is developed and expanded consistently, providing benefits to all SNAM holders.

The game's economy is based on the principles of a real economy. It has its own monetary system and laws, which are influenced by the players themselves. Players use a (SNAM) governance token allowing them to interact with all major cryptocurrencies.

The ways of acquiring tokens are varied:
- trading;
- creating NFTs, buying/selling NFTs.
In the near future, Snakemoney.io members will be able to create, buy, sell NFTs in our NFT marketplace. This is a great way to earn and increase your snake's chances of winning in the game!

The Snakemoney.io marketplace will provide the ability to directly purchase project token (SNAM) or NFT directly in-game by paying with other cryptocurrencies via a digital wallet. Key features of Snakemoney.io NFT marketplace:
- In-game NFT stores;
- Direct in-app purchases; - Various in-game DEXs with liquidity pools filled with in-game resources. In DEXs, you can buy, get liquidity guarantees and the resulting arbitrage opportunities; - Player-created individual stores for their projects, where players can trade items directly interacting with other players;
